PERMISSIONLESS

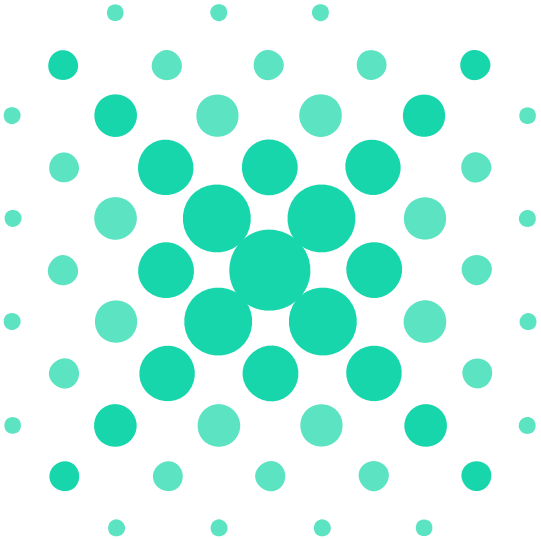
"A BRAND FOR A COMPANY IS LIKE A **REPUTATION** FOR A PERSON. YOU EARN REPUTATION BY TRYING TO DO **HARD THINGS WELL**."



WELCOME

The purpose of this document is to provide guidance on use of the Permissionless logo by authorized partners who are developing partner-branded marketing materials. Please review this guide before developing consumer-facing, employer-facing, media and stakeholder materials. Guidelines must be followed when materials are co-branded with Permissionless.

LOGO VISUALS

SECTION ONE

1.1 INTRODUCTION

The Permissionless logo is in Line and Xor black on a white background. Only use solid black or white versions when color is not an option. The blue logo is our most universally recognized asset, and to aid comprehension, we use that version wherever possible. The correct logo has a lowercase “tm”.

LOGO QUALIFICATIONS AND REQUIREMENTS

To qualify for use of any of these logos, you must meet the requirements of the appropriate logo program for each product you use the logo on. For more info on those requirements.

LOGO USAGE OVERVIEW

In all new productions and printings of your products and related marketing materials, use the logo that correctly represents your product’s qualification and follow these guidelines.
All Permissionless licensing logos are intended for use on a physical product, its documentation and packaging, or as a descriptor on a product’s boot-up or information screen. Any use on Websites and/or marketing materials must be closely tied with a description of the qualifying product.

These guidelines outline rules for correct presentation of the appropriate Permissionless licensing logos in a variety of applications and media. While different Permissionless licensing logos are used interchangeably in these illustrations, all illustrations apply to all logo types.
The appropriate Permissionless licensing logos may be used only in accordance with these

1.2 PRIMARY MARK

The Permissionless Wordmark shown here is the primary logo for the Permissionless Company. Alternate versions are displayed as well and the logo colors should always follow these example versions. This wordmark must stand alone. It should beused as a singular graphic element. It should not be used as part of another mark and shouldnot be combined with another logo, mark, graphic or other visual element.

LOGO ELEMENTS

The Permissionless Logo is the combination of two separate elements: The Logo type and the icon which together create the “Wordmark” or full logo. The full-color logo shown below is the primary and preferred visual identification.

Icon

Logo Type

Logo

PERMISSIONLESS

THE LOGO ICON

The logo icon should never be one solid color but two tone of the same color as shown above.

PERMISSIONLESS

THE LOGO TYPE

The permissionless mark should only be used with the logo icon.

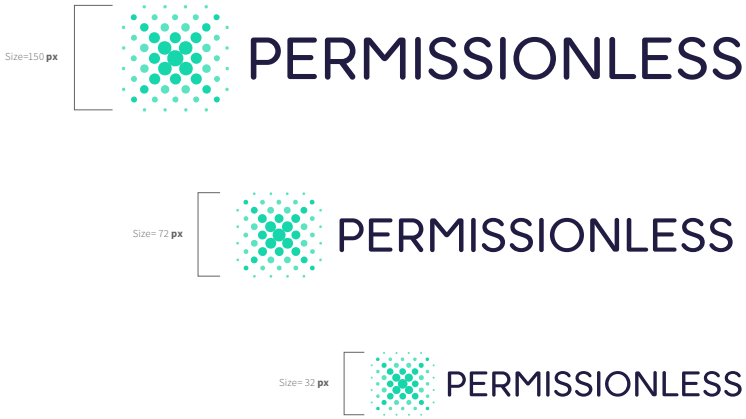
The black and white versions are only to be used if necessary due to color restriction or background color.

PERMISSIONLESS

PERMISSIONLESS

1.3 LOGO SIZE GUIDELINES

To standardize the use of the tag, three sizes are provided for most uses—50 pixels high for web banners and e-mail headers, .875” high for printed materials, and 72 pixels high for web pages. These sizes should be considered the minimum size for print/online uses. For printed communication, add .125” to the top or bottom of the red field to cover bleed.combined with another logo, mark, graphic or other visual element



LOGO SIZE SPECIFICATIONS

50 pixel logo used for:
- email newsletter
- web banner

72 pixel logo used for:
- web page

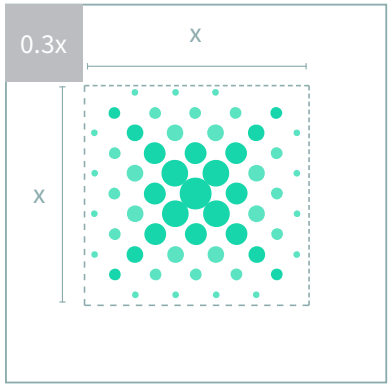
7/8” logo used for:
- 5 x 7” postcard
- 6 x 9” booklet
- 8.5 x 11” format
- A4 format
- A3 format
- 11 x 17” format

MINIMUM SIZE

This is the smallest the logo should be used in marketing, promotional or print material.

1.4 CLEAR SPACE

The Permissionless LOGO requires a safe area of approximately one full-letter height around all text edges, on all four sides. This safe area protects the logo from clutter, impingement and brand confusion when used in conjunction with other graphic elements.



ICON SPACING

In order to preserve the integrity of the PrimaryLogotype, it is important that no other logos, type or other graphic elements infringe on itsspace. The minimum clearspace around the logotype is equivalent to 1/3 of the width of thelogotype.

MAIN LOGO SPACING

In order to preserve the integrity of the PrimaryLogotype, it is important that no other logos, type or other graphic elements infringe on itsspace. The minimum clearspace around the logotype is equivalent to 1/3 of the width of thelogotype.

BACKGROUND COLOR VARIATIONS

The Blue/White Version
will be used when the backround color is light colored.

The Green/White Version
will be used when the backround color is dark colored.

The Green/White Version
will be used when the backround color is dark blue colored.

The Full Color Version
will be used when the backround color is light colored.

02

TYPOGRAPHY

SECTION TWO

2.1 TYPEFACE

Open Sans is the preferred Permissionless brand typeface. Its clean, contemporary style accentuates the streamlined experience we deliver to our customers. To reinforce clarity and consistency in our design, please follow these general guidelines:

ALIGNMENT: Left align or center align is preferred. Right align is okay when required by the design but should be last resort.

HEADLINES AND SUBHEADS: Headlines should be in all-caps (LOREM IPSUM) in all use cases. Sentence case (Lorem ipsum) or lower case (lorem ipsum) should be avoided for headlines using the Ultima typeface.

INTRO COPY, BODY TEXT , AND LEGAL DISCLAIME RS: Should always be in sentence case (Lorem ipsum).

INITIAL CAPS (LOREM IPSUM): Only use on buttons, marks, labels, and Permissionless entities.

ITALICS : Can only be used where required by style conventions, such as names, titles or quotes.

TRADEMARKS: The “tm” must be included with “Permissionless” the first time it appears in plain text. The preferred case for trademarks is lower case. The traditional all-caps “TM” can be used when lower case is not an option.

KERNING AND TRACKING: In Adobe applications, kerning shouldalways be set to optical and tracking should never set it to less than -15 or greater than 15.

ALTERNATE TYPEFACES: Proxima Nova is the primary alternate typeface. Helvetica Nue is used as a secondary (digital) alternate typeface. Please read detailed usage instructions on the next page.

2.4 GENERAL USE

These are general guidelines that will apply to most DR materials, and are consistent with guidelines for advertising and literature. Additional guidelines with respect to specific DM components are noted in Section 8.0. Always use the Permissionless set of fonts in all applications.

HEADLINES

On brochures, inserts, letters (i.e., on Johnson Boxes) and envelopes, headlines should always be prominent and set in the largest type size on the page. Headlines are always set in Ultima Regular. Do not use Ultima Bold or Light for headlines (although bolding key words or phrases to draw reader attention is acceptable). Headlines may also be left or center justified but not set flush right.

SUBHEADS

Subheads can use a large type and can also be presented in any ULTIMA weight or style as long as it’s not the same font weight as the headline. Avoid using more than 2 font styles in subheads. Subheads may also be left or center justified but not set flush right.

IN-MARKET TESTING

It is understood that at times there is a desire to use alternate fonts in select DR communications, and direct marketers may wish for further flexibility beyond the Permissionless font style to draw attention to important call-to-action messages or to highlight important brand, product or service benefits. Direct marketers are encouraged to perform further comparative testing. It is requested that testing be limited to constrasting fonts on, or within, DR components to stimulate call-to-action and response in selected test markets.

COLOR PALETTE

SECTION THREE

3.1 CORPORATE COLOR SYSTEM

Beyond our logo, color is the most recognizable aspect of our brand identity. Colors were selected that reflect our professional, financial and technical community and given names that reflect their inspiration. Using color appropriately is one of the easiest ways to make sure our materials reflect a cohesive Permissionless image or visual story.

PERMISSIONLESS COLORS

There are eight Permissionless colours . One colour in combination with black and white, should lead on an application. General guidance in proportions is provided in the colour wheels on this page.

Do not use more than one color combination on the same page unless you are working with graphs and charts.

Using colours together Within an application, colours may switch in order to divide sections or topics of communication (as employed in this guidelines document). When using the colours in this way, there should always be a clear and simple logic for the changing of the colours within the application.

USE OF TINTS

As a general rule, tints of the colours are to be avoided, but may be used for graphs and charts where colours are limited (eg single-colour printing).

3.2 PRIMARY PALETTE

Permissionless signature color is yellow and blue on a white background. These should always be considered as the primary colors. Black is to be used very sparingly.

#FFCC00

Color RGB value is (255,204,0).
This hex color code is also a web safe color which is equal to #FC0.

#ffcc00 hex color red value is 255, green value is 204 and the blue value of its RGB is 0. Cylindrical-coordinate representations (also known as HSL) of color #ffcc00 hue: 0.13 , saturation: 1.00 and the lightness value of ffcc00 is 0.50.

The process color (four color CMYK) of #ffcc00 color hex is 0.00, 0.20, 1.00, 0.00. Web safe color of #ffcc00 is #ffcc00. Color #ffcc00 contains mainly RED color.

BRANDED ASSETS

SECTION FOUR

4.1 BRANDED ASSETS

Business cards are cards bearing business information about a company or individual. They are shared during formal introductions as a convenience and a memory aid.

A business card typically includes the giver's name, company or business affiliation (usually with a logo) and contact information such as street addresses, telephone number(s), fax number, e-mail addresses and website.

Permissionless business cards include the company logo and the individuals Name, Corporate Title, Corporate Email Address, Personal Phone, Corporate Phone, Headquarters Address.

4.2 BUSINESS CARDS

This is the Permissionless business card template. Notice the consistent use of Proxima Nova as the typeface for all information. Please ensure that all information is correct before submitting your card for print.

DESKTOP
Us eatur re perit ea consecu llatum repel in peri beat. Necepel lautateseque prepeli quatquidus.

4.6 EMAIL SIGNATURES

In an effort to remain on brand, the email signatures by all employees should be consisten following the guide below. This will ensure that the email signature will look the same across the board from desktop to mobile to tablet.

NOTES

• All non-logo text should be in the alternate typeface, Arial. This is to ensure consistency across all digital platforms.
• Phone numbers should soley consist of numbers (no parentheses, spaces, or hyphens), in order to be readable across all mobile platforms.

05

LOGO PLACEMENT

SECTION FIVE

5.1 LOGO PLACEMENT

Whenever possible, the Permissionless logo should be placed in the upper right corner of the webpage/page in full color, on a white background.

Logo placement helps build Permissionless brand awareness. On printed material like a letterhead, a business card or an envelope, double the distance of the letters around the edge. We have created two examples that illustrate this concept.

PRINT

In print applications, “initial view” refers to the cover of materials with multiple pages or the front of one-sided materials. For two-sided materials, the logo can appear on either side depending on design.

EMAIL

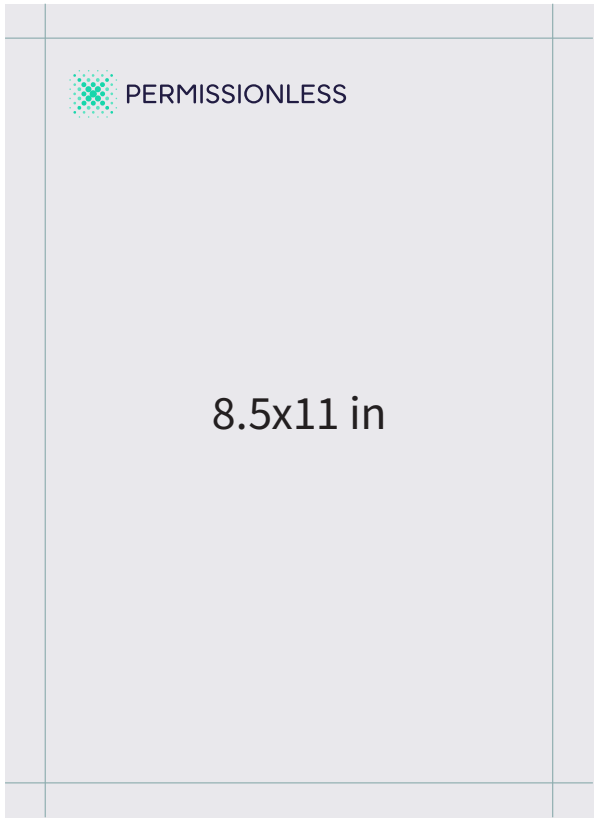
For HTML emails such as department newsletters, the logo must appear somewhere within the message. It does not need to be in the header.

WEBSITE

The logo must appear before any user interaction (click, scroll, input, etc.).

5.2 THE RIGHT PLACE FOR LOGO

In an effort to remain one brand, one voice we are simplifying our email signatures. Our emails will no longer have an attached logo — it is all text based. This will ensure that the email signature will look the same across the board from desktop to mobile to tablet.



PRIMARY PLACEMENT

SECONDARY PLACEMENT

SPACING FOR PRIMARY PLACEMENT

SPACING FOR SECONDARY PLACEMENT

06

WEB GUIDELINES

SECTION SIX

7.1 WEB GUIDELINES

This chapter tells you about the foundations upon which the Permissionless site has been designed.

The internet brings great opportunities and new customers wanting to explore Permissionless in a different way.

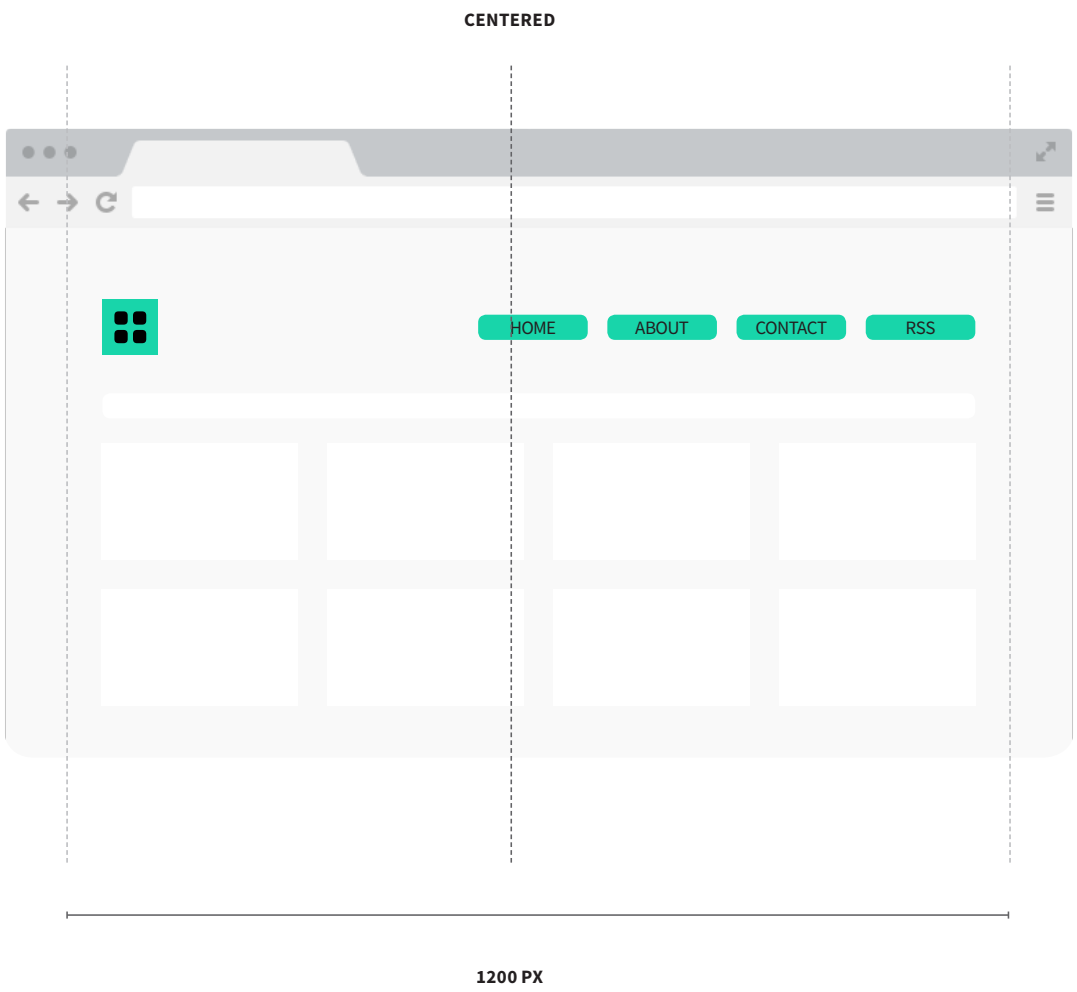
Our brand identity is a major resource in successfully recreating the Permissionless identity online. The Permissionless homepage sets the style for the whole site. It must most of all inspire.

The Permissionless brand identity – elements and typography – should be very much in evidence, the navigation system simple and easy to use and the content interactive and inspiring.

Featuring the grid systems on top of which page templates have been developed. The ‘Spacing and margins’ details will give you an understanding of how to position items in pages.

7.2 WEBSITE FOUNDATION

-



The Permissionless website will be full page positioned in all web browsers. The background colours will expand to fill to the width of the browser window, as shown below.
The measurements below, and throughout this document reference ‘pixels’

SPACING AND MARGINS

These details will help you place items on the common page grid sustem.
» the spacing between text is always 10 pxl
» The left padding for promotion panel is always 10 pxl
» The general spacing between objects in the main column is 30 pxl
» If hand drawn line separates two objects, 30 pxl spacing is placed either side of the line.
» The general spacing between objects is 30 pxl.
