

TIE LOVE

Lead Product Designer | AI-Native Products | 0→1 Systems

Boise, ID · Open to remote & relocation
madebytie.com/hire · linkedin.com/in/tielove
tie@madebytie.com

SUMMARY

Product designer and AI product builder with 18 years shipping digital products end to end — from agency client launches to founder platforms. I bring founder-level ownership into team environments: faster shipping, less design-to-engineering friction, and AI-native features that reach production. Four production-grade platforms designed and built solo; 169+ client projects delivered.

CORE STRENGTHS

- 0→1 Product Ownership
- Product Design & UX
- AI-Native Product Strategy
- Platform & Systems Design
- Design Systems & Brand
- AI-Orchestrated Development

EXPERIENCE

Founder & Lead Product Designer — made by tie

Boise, ID · Mar 2025 – Present

Independent product studio. Designed and shipped four production platforms solo, owning brand, product design, platform design, and AI-orchestrated development:

- **Scope Architect** (launched 2026) — mission control for building with AI: turns an idea into an agent-ready plan, hands work to coding agents over MCP, and keeps every task, token, and PR visible through cloud sandbox execution
- **Vizon OS** (private beta, in use with client teams) — multi-tenant AI-native business OS: CRM, projects, collaborative docs, real-time messaging, and AI agents in one data model
- **Capsule** (private beta) — agency operating system: AI scoping, proposals, e-sign, project management, client portals
- **LoreTorch** (launching 2026) — virtual tabletop with an AI game master; live multiplayer state and real-time session orchestration

Founder & Principal Designer — Capsule (launch studio)

Las Vegas, NV · Sep 2019 – Aug 2025

Launch services studio for startups and SMBs — brand, web, and product launches.

- Ran client engagements end to end — aligning founders and stakeholders from discovery through launch
- Wound down the studio in 2025 as founder products went full-time; its operations became the blueprint for Capsule, the agency OS (above)

IPG

2016 – 2017

Web Design & Developer (consulting) · 6 months

- Led the corporate website redesign end to end — aligning executives, department leads, and the marketing team from discovery through launch

Designer, Marketing Team (full-time) · 1 year

- Hired full-time following the consulting engagement; owned internal design systems, internal and client-facing product UI, and design for sales and event materials across departments

Founder & Product Designer — aPage

2017 – Sep 2019

Product venture run concurrently with Avolve Digital. One-page website system for startups to validate product-market fit before investing in a full site build. Designed the product, brand, and template system.

Founder & Design Lead — Avolve Digital

Jan 2012 – Sep 2019

Growth-driven design and inbound marketing agency: branding, web design, and digital marketing for startups and global brands.

- Bitmain / BCH Devcon — global hackathon brand, site, and growth systems, 0→launch in 2 weeks
- Permissionless Ventures — \$50M VC fund brand and marketing site in 3 weeks
- Windward Tech District — city-scale tech ecosystem brand and launch platform

Freelance Web & Brand Designer

2008 – 2012

Independent client work from age 18: brand identities and websites for small businesses — the start of 18 years working directly with clients.
